

FOODLUBE[®] UNIVERSAL 2

Performance you can trust

CUSTOMER

Carnaud Metal Box – Worcester

APPLICATION DETAILS

The general lubrication of a can beading machine, formerly being lubricated with Castrol Optimol Obeen UF2.

The company required a multi-purpose NSF- H1 registered grease to lubricate the critical areas of the beading machine that did not cause them costly problems.

FOODLUBE Universal 2

BENEFITS/COST SAVINGS

After switching to Foodlube Universal 2 Carnaud Metalbox monitored performance for a year, the results were;

- ▶ No failures
- ▶ Reduced grease usage / expenditure
- ▶ Energy savings

Due to the higher performing Foodlube Universal 2 being in use **no failures occurred** and the grease consistency remained the same controlling the metal to metal contact.

50% less grease was used due to using a higher performing grease.

Power draw was monitored and calculated resulting in a **saving of £2.25 per day**.

The elimination of failures was not quantified but the usage and power savings were;

Power Costs £2.25 x 365 days = £821.25

Grease Cost 50 % less = £2000

TOTAL= £2821.25
