

ROCOL[®] Environmental Policy Statement

ROCOL handles a wide range of materials during the design, manufacture and supply of maintenance products, specialist lubricants, specialist paint and anti-slip systems, some of which are filled into aerosols.

ROCOL recognises its responsibility to minimise the environmental effects of these activities on the local communities, their employees and their customers. ROCOL is committed to reducing its impact on the environment, the prevention of pollution and the achievement of continuous improvement in environmental performance.

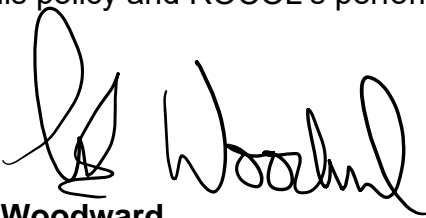

ROCOL will always seek to comply with all applicable environmental legislation, codes of practice and other applicable requirements.

The environmental impact of ROCOL's activities will be identified and reduced or eliminated through the setting and review of objectives.

All employees have a responsibility to help meet the requirements of this Policy and training will be given to achieve this.

This policy is documented, implemented, maintained and communicated to employees in an Environmental Management System based on ISO 14001. This policy is available to all interested parties, on request, including the public.

This policy and ROCOL's performance will be reviewed on a regular basis.

G Woodward
Operations Director Fluids Europe
